Take care feel better

A debilitating disease with a substantial social impact

Increasingly more people suffer from gonarthrosis. It affects the old and young alike, especially if they practise high-intensity sports, do a physically demanding job, or have experienced previous knee injuries. This disease often involves taking sizeable quantities of pain-relief medication.

We are committed to alleviating the pain and discomfort felt by so many patients which is why we originally designed the **ORTHO-A** knee brace for gonarthrosis.

APPLICATIONS

In the case of unicompartmental gonarthrosis, the **ORTHO-A** knee brace uses targeted pressure to help realign the joint, increasing the separation between the femoral condyle and the tibial condyle and “virtually” rebuilding the space previously occupied by the cartilage. With less weight now on the compromised compartment (medial or lateral), patients experience considerably less pain and stiffness.

ORTHO-A

LIGHT STRUCTURE MADE OF FOAM AND ALUMINUM ALLOY

Two super-strong yet lightweight materials working together to facilitate joint realignment and pain reduction.

WEDGES TO LIMIT EXTENSION AND FLEXION

It limits flexion and extension to the degree prescribed by the orthopaedic surgeon.

FOAM PAD

Soft against the skin, the hypoallergenic pad remains securely in place. Easy to remove and wash in lukewarm water.

FOUR NUMBERED PADDED STRAPS

To facilitate closing.

A painful knee
is crying out for help.
We provide an
immediate solution.

DOUBLE REGULATION JOINT OF MEDIAL AND LATERAL LOAD

It enables the brace's condyle pad to be moved medially or laterally to create the right amount of "force" on the joint needed to correct its position.

NEW

NEW

LOCKING BUCKLES WITH SAFETY BUTTON

Never lose the correctly adjusted length of the straps and always have just the right amount of tension with minimal effort.

ORTHO-A

Orthosis for gonarthrosis

Item	REF.91014 right or left
Size	one size
Colour	grey

right or left

RIGHT= for medial gonarthrosis of the right knee (varus right knee) or for lateral gonarthrosis of the left knee (valgus left knee).

LEFT= for medial gonarthrosis of the left knee (varus left knee) or for lateral gonarthrosis of the right knee (valgus right knee).

Indications

- Moderate unicompartmental gonarthrosis.
- Post-surgery cartilage or meniscus treatments.

Contraindications

- Currently no known
